

How to put ads in WordPress website ?

Step1 : goto settings then ad inserter plugin

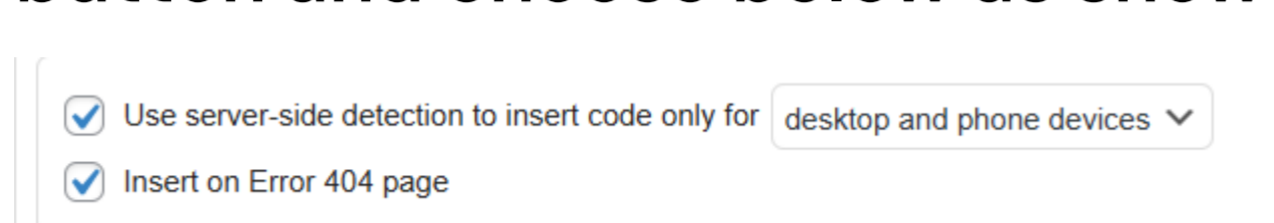

Step2 : for top header ads goto setting of ad inserter plugin then click on header and put this code as shown in image below then choose where to show ads like page, post, then click on save settings but dont forget to enable dot button near to php must come green button then only show ads

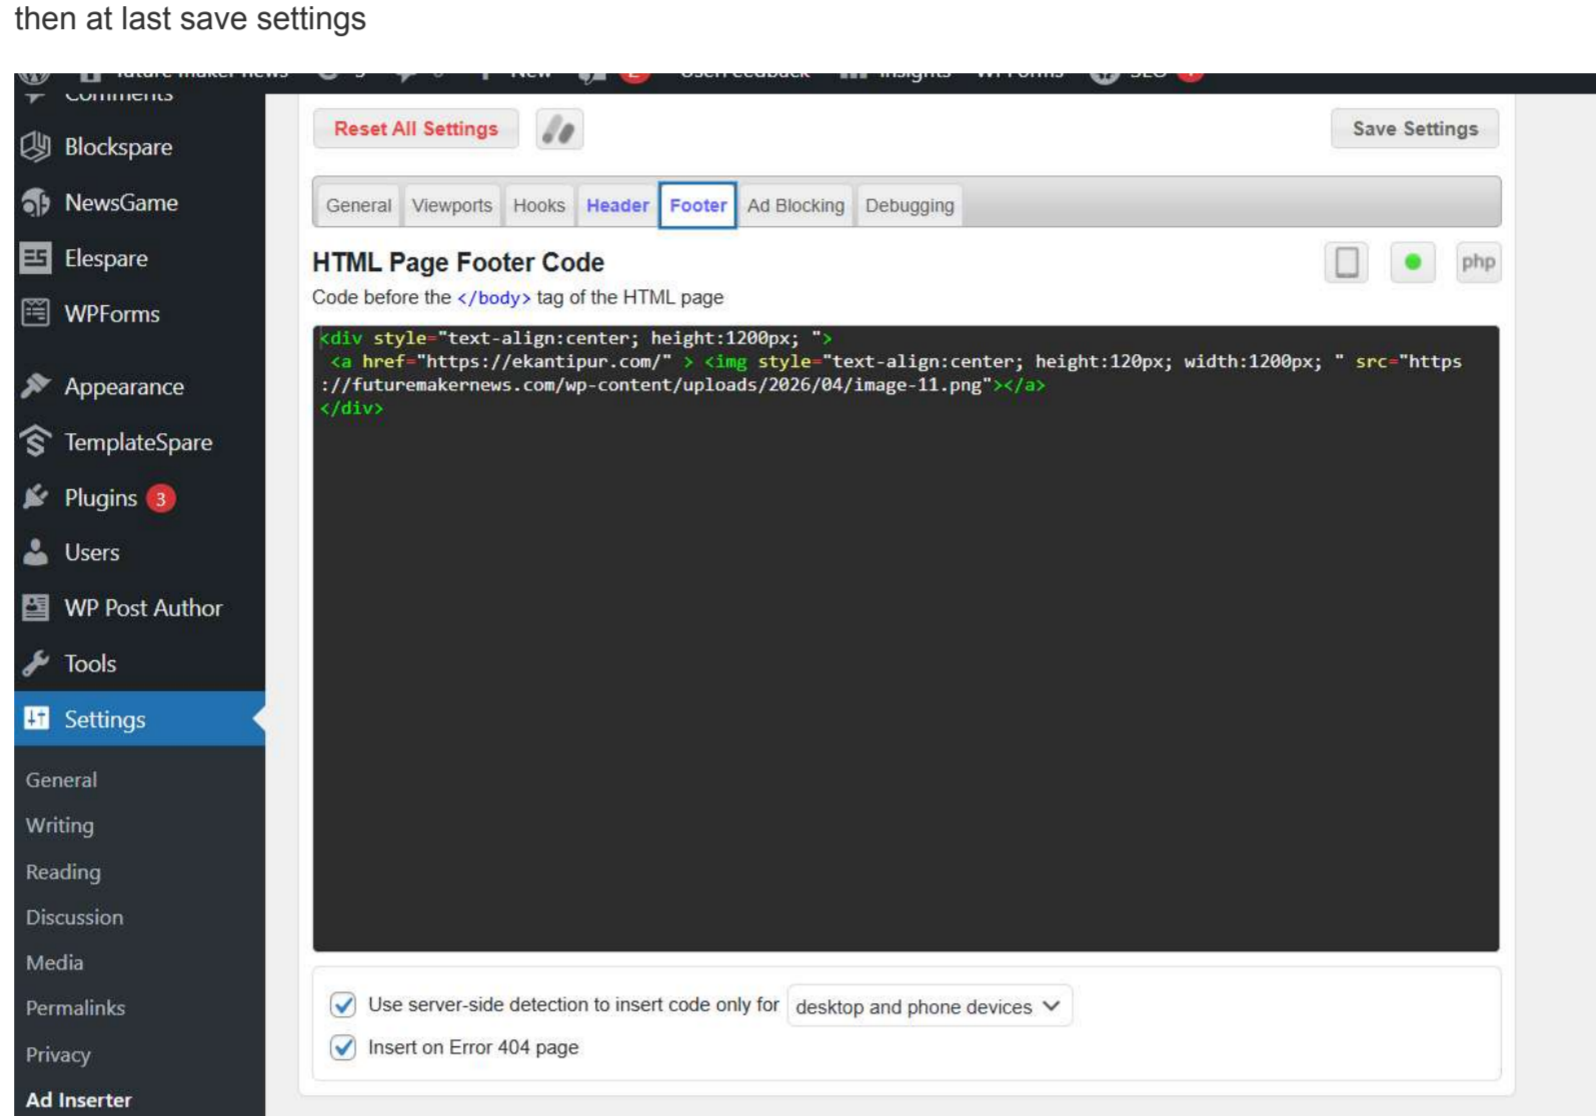

after that top header ads show like this below in image

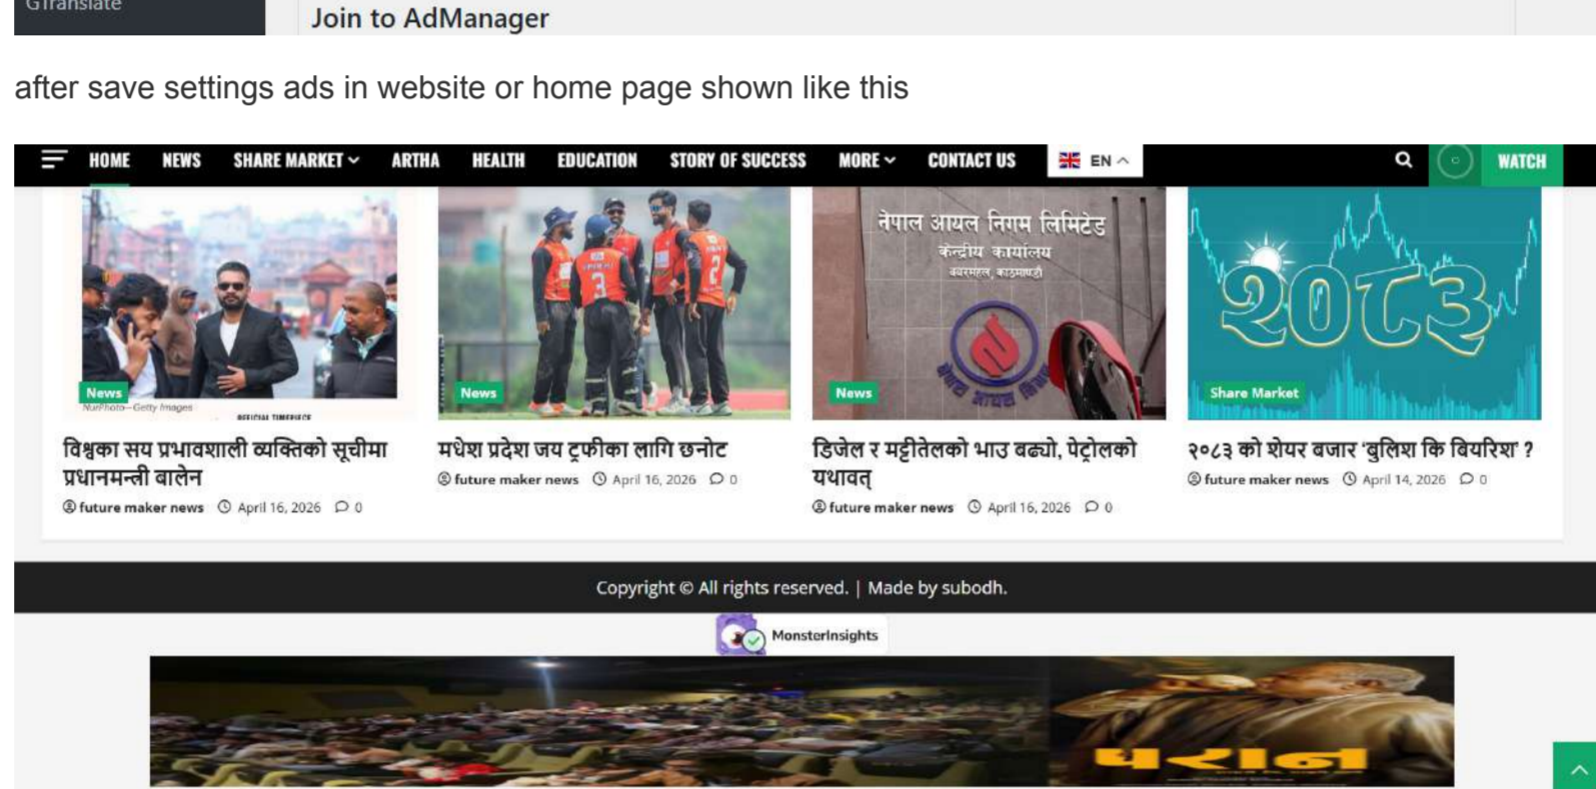

for footer ads same like header ads put code of ads in footer then enable dot button and choose below as show in image

then at last save settings

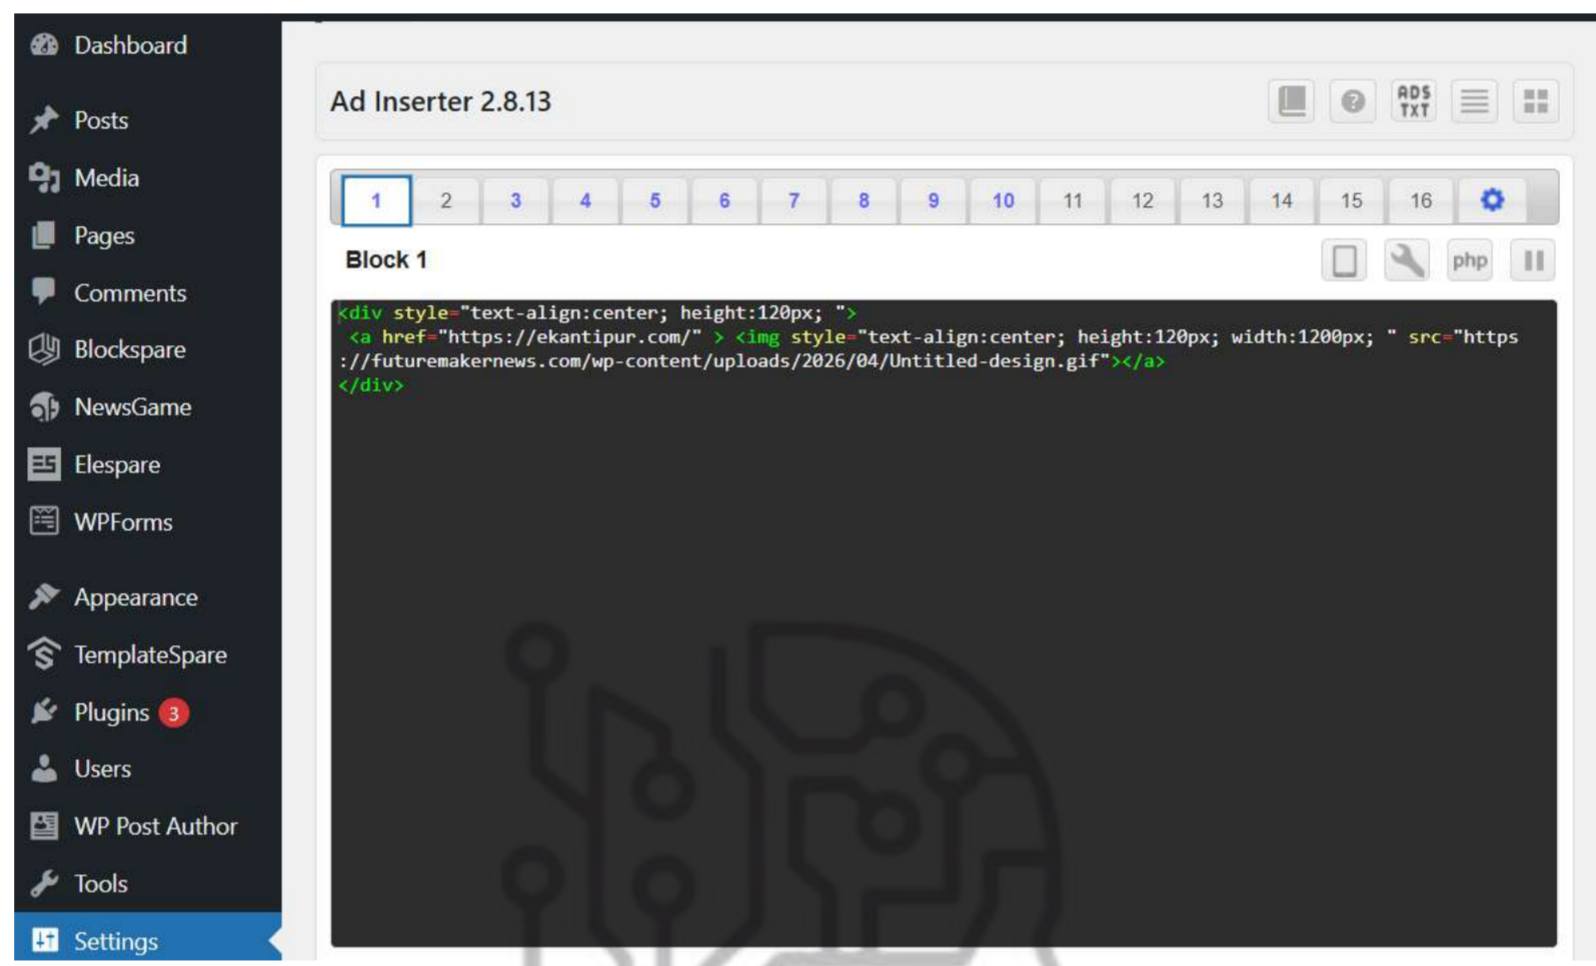

after save settings ads in website or home page shown like this

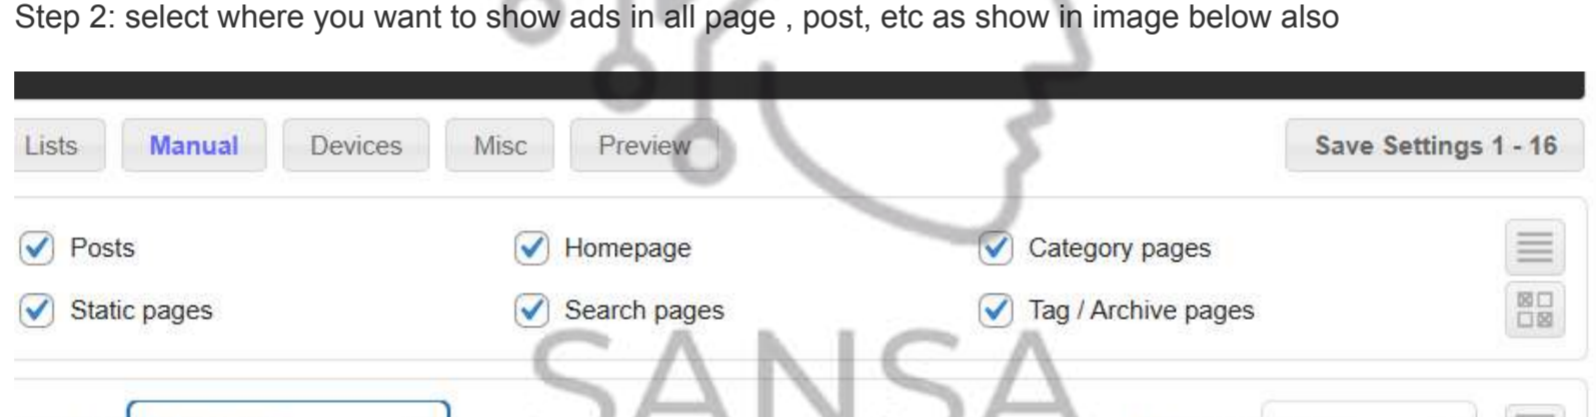

Now for header ads

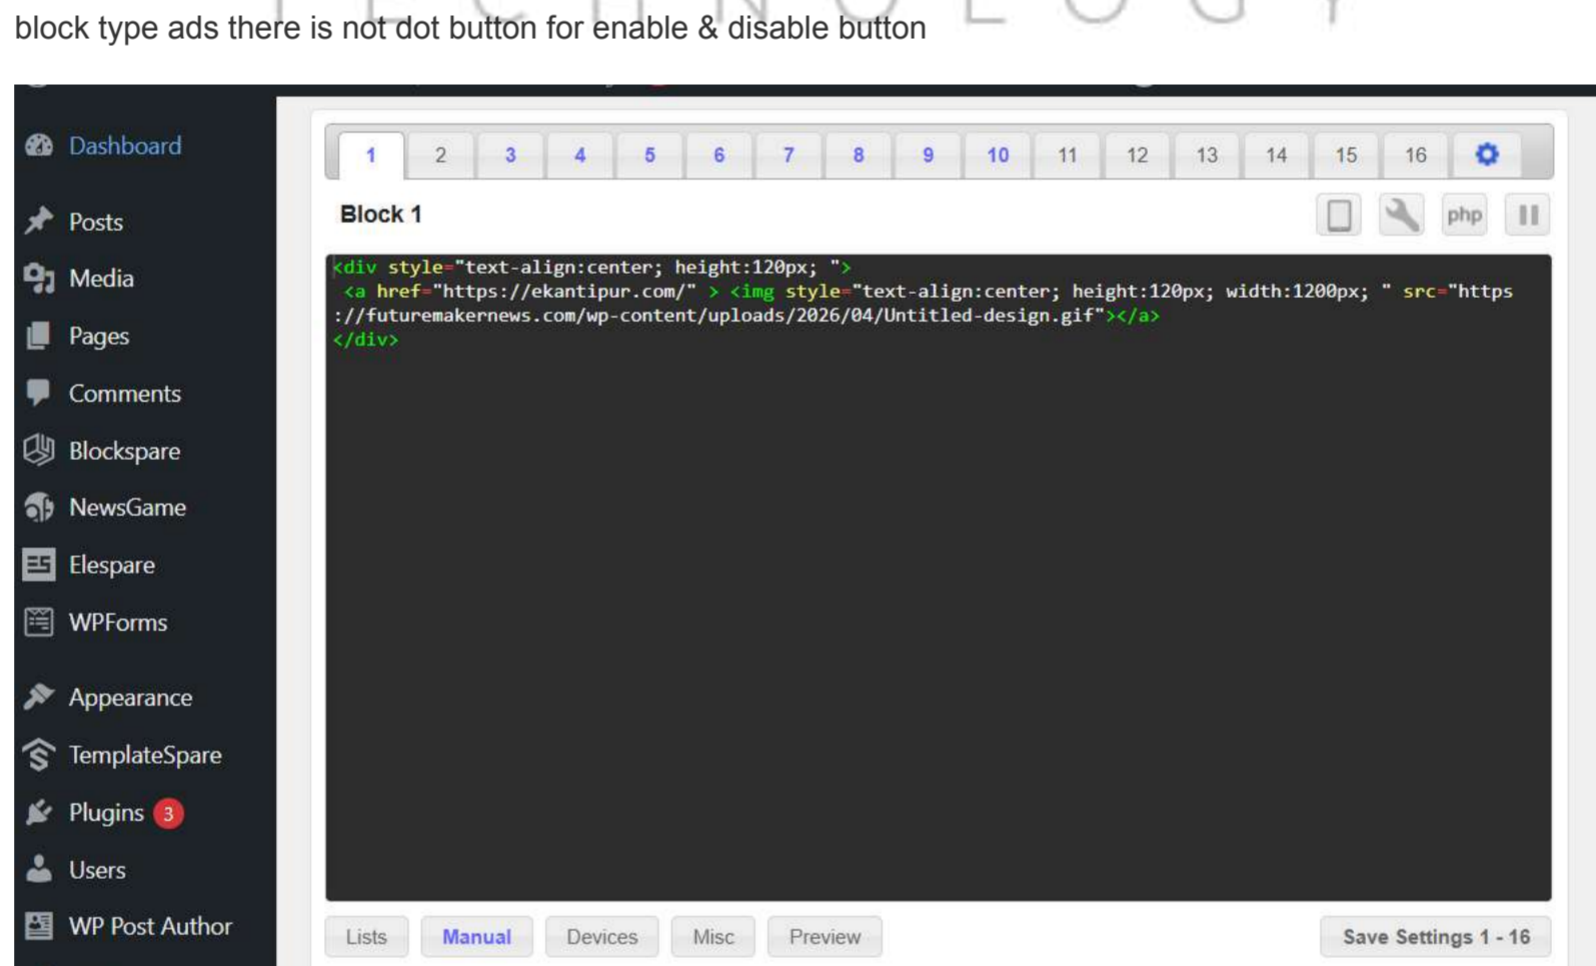

Step1 : goto ad inserter plugin then goto block 1 put ads code

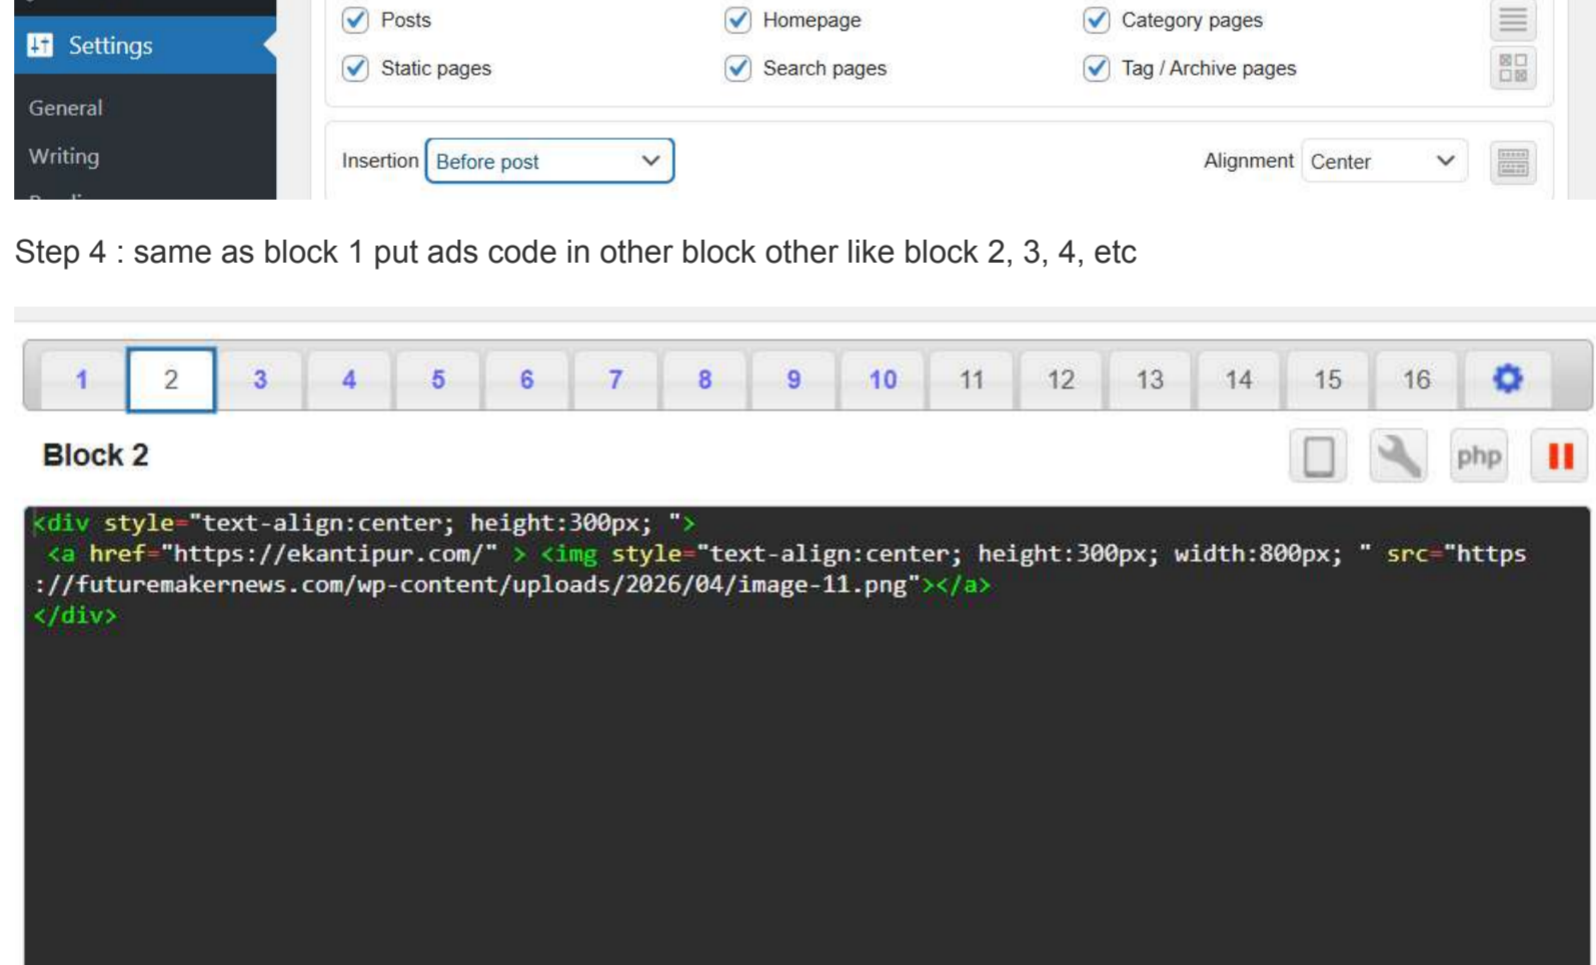

Step 2: select where you want to show ads in all page , post, etc as show in image below also

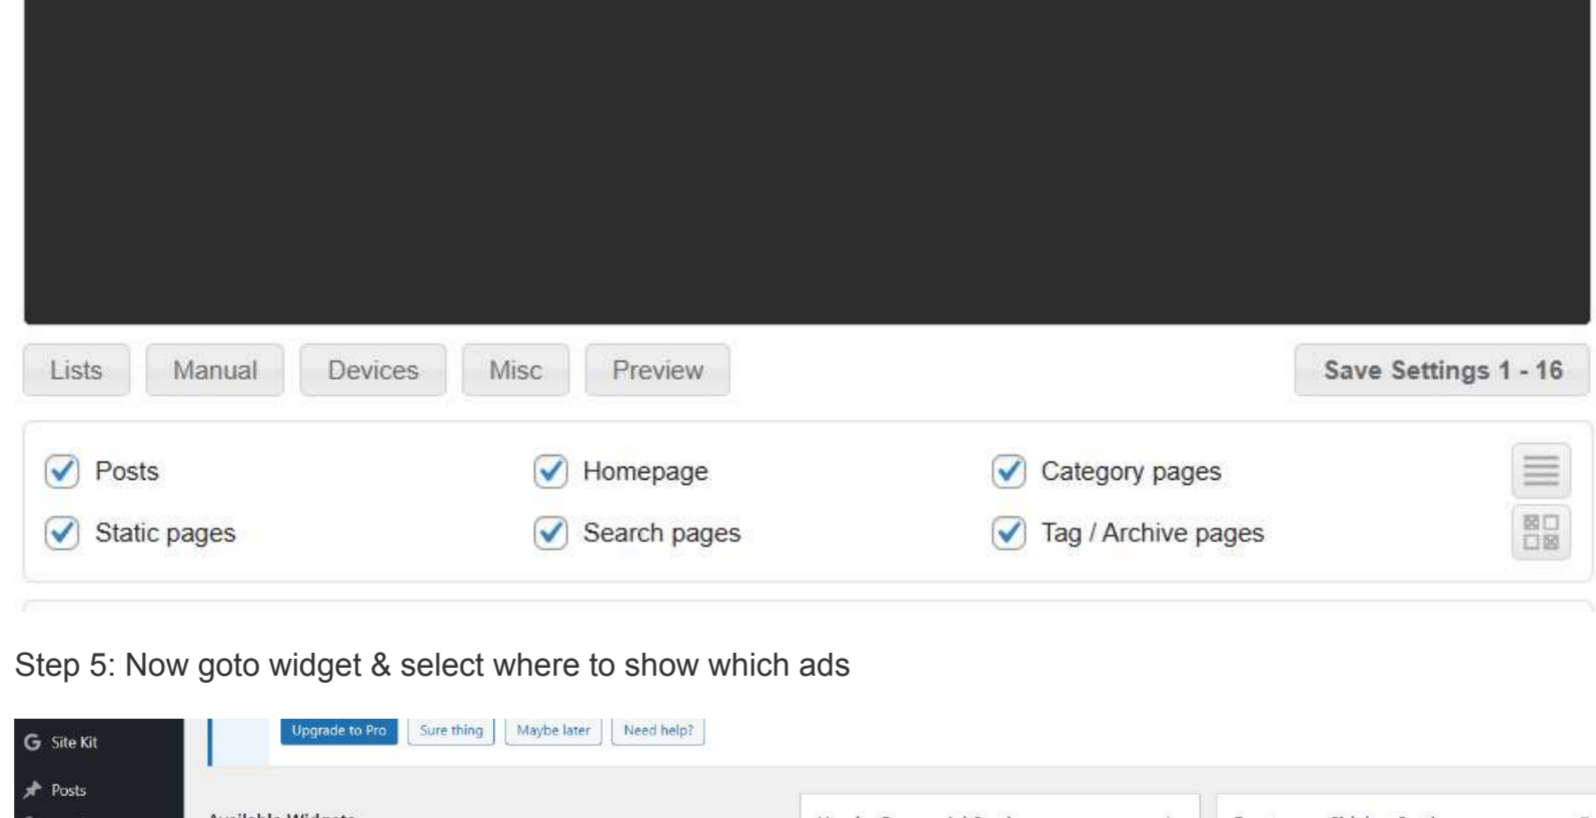

Step 3 : Dont forget to choose alignment left, right ,center as your choice then at last do save settings and in block type ads there is not dot button for enable & disable button

Step 4 : same as block 1 put ads code in other block other like block 2, 3, 4, etc

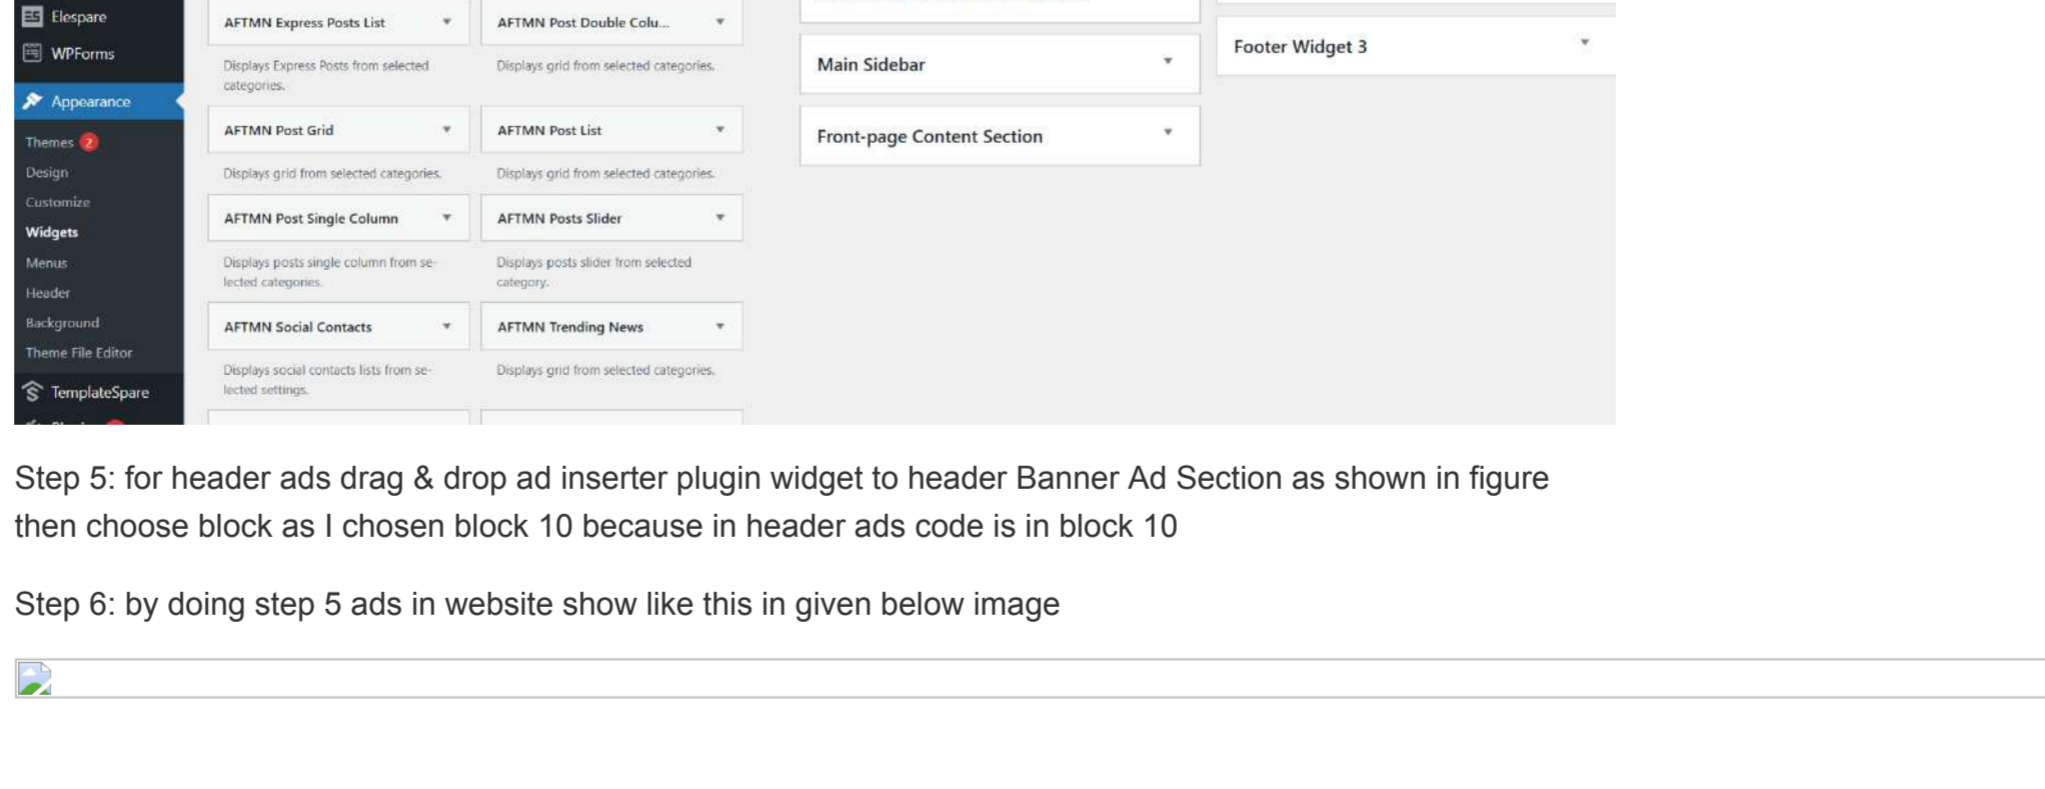

Step 5: Now goto widget & select where to show which ads

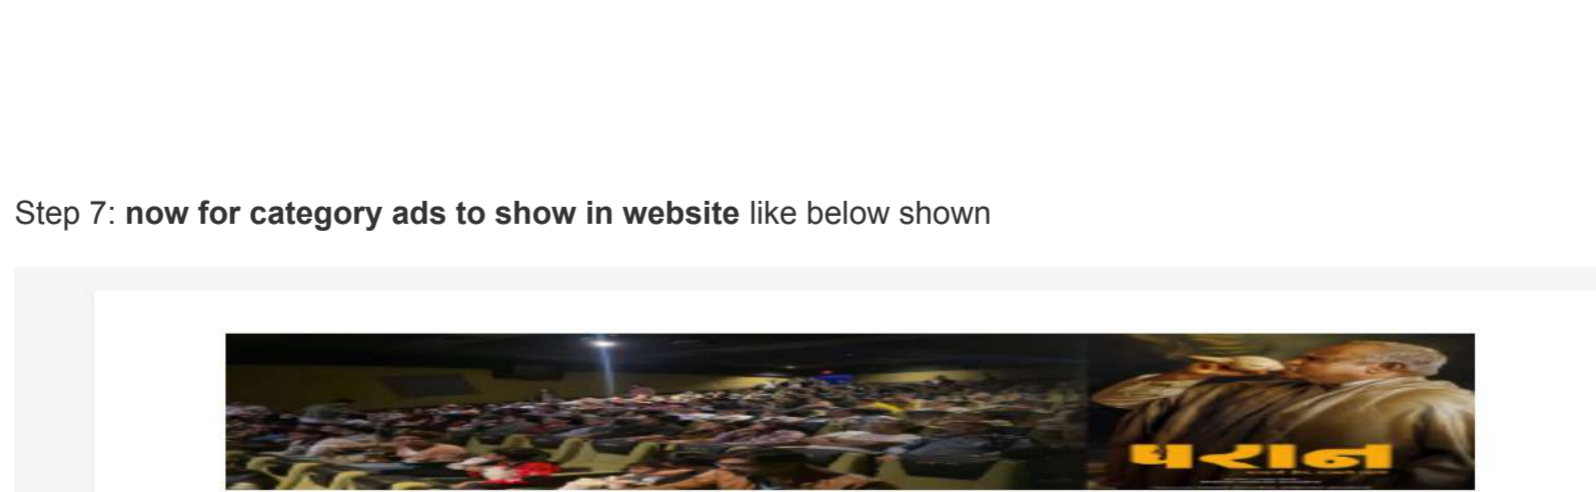

Step 5: for header ads drag & drop ad inserter plugin widget to header Banner Ad Section as shown in figure then choose block as I chosen block 10 because in header ads code is in block 10

Step 6: by doing step 5 in website show like this in given below image

Step 7: now for category ads to show in website like below shown

Step 8 : Now drag & drop ad inserter plugin widget to Front-page Content Section then below or above your category drag ad inserter plugin widget and select which block code show that category ads as shown in figure

Thats it.

Ads Code given below :

```
<div style="text-align:center; height:120px; ">
<a href="https://ekantipur.com/" ></a>
</div>
```
